EXPERIENCE

Korra (Ledger Investing), New York, NY *Financial tech brokerage and analysis firm for insurance-linked securities.*

Senior Data Scientist/Machine Learning Engineer

Sept 2022 – present

- Proposed and developed MCP interfaces for the platform's transaction and document-extraction services; now lead the initiative and demo new capabilities to clients and prospects.
- Shipped interactive MCP apps for loss triangles, financial reporting, forecasting, and portfolio insights, with data fetched at render time rather than passed through model context.
- Developed workflows for ingestion, validation, valuation, and reporting as the firm turned bespoke analytics for casualty insurance transactions into a generalized platform for insurance and reinsurance counterparties.
- Own the bordereau pipeline end to end in the platform's TypeScript and Python codebases, from Excel ingestion and validation through client-facing interfaces; previously applied the firm's Bayesian valuation models to price prospective deals and renewals and contributed to backtesting infrastructure.

OneGlobe LLC, Reston, VA *Federal technology contractor staffing Kessel Run, a US Air Force software factory.*

Data Scientist/Technical Lead

May 2020 – Sept 2022

- Took on technical leadership for a user analytics platform deployed to classified Air Force networks, directing engineering decisions for a team of 4–7 and reviewing code across the stack.
- Extended a JavaScript analytics library to fit Air Force frontend standards and contributed to a companion Java library for backend services; both made available for integration across other product teams.
- Analyzed event data in Python against a Postgres warehouse and replaced an initial Grafana-based approach after it proved undeployable on airgapped networks, learning React to build custom dashboards deployed on Kubernetes.

U.Group, Washington, DC *Design and technology firm staffing Defense Intelligence Agency and DHS.*

Data Scientist

November 2018 – May 2020

- Implemented NLP and graph algorithms for entity resolution and analysis of military intelligence data, along with a custom API to serve results.

Excella Consulting, Arlington, VA *Agile transformation firm consulting for corporate and government clients.*

Data Scientist – Senior Consultant

August 2017 – November 2018

- Restructured Monte Carlo simulation in Python to estimate a \$100M change for a corporate hospitality client's customer rewards program – improved model reduced run time by 70% and errors by 90%.

ANALYST ROLES

Kaiser Associates Consultant

Nov 2014 – Oct 2016

The Advisory Board Company Analyst/Research Associate

Jan 2013 – Oct 2014

Greenberg Quinlan Rosner Research Project Associate/Research Associate

Sept 2010 – Dec 2012

SKILLS

- **AI & ML:** MCP, LLM application development, agent evaluation, Bayesian modeling, scikit-learn, PyMC3, PyStan
- **Languages & Frameworks:** Python, TypeScript, React, SQL, FastAPI, Flask
- **Infrastructure:** AWS, Google Cloud, Docker, Kubernetes, Postgres, Databricks

TALKS

- "The Bermuda Actuarial Library", CLRS 2025
- "User Analytics for DoD Software," DoD Digital and AI Symposium, 2022
- "How and Why to Put Your Jupyter Notebooks Into Docker Containers," PyData NYC 2019

EDUCATION

General Assembly *Data Science Immersive*

March – May 2017

University of North Carolina at Chapel Hill

May 2010

B.A. Economics, Political Science – Minors: Creative Writing, Business Journalism
